## Projects

---

**LANG MASTER** (Team Project- Mernstack ) [Live link](#) | github> [client link](#) | [server link](#)

**Technologies:** ReactJS, Typescript, TailwindCSS, Firebase, Node.js, Express.js, and MongoDB

- This website is for learning English, where users can learn English.
- On this site, we have locked units except the first one, which includes so many different types of English questions. After finishing one, you will be unlocked one by one and get coins.
- We can buy books with coins, and if we complete all the units, we get a certificate.

**BookList** ( NextJS project ) [Live link](#) | github> [code-link](#)

**Technologies:** NextJS, TailwindCSS, ShadcnUI and MongoDB/PostgreSQL

- This is a site for BookListing, where an authenticated user can store a favorite book.
- Secure Login and SignUp Functionality by generating a token to make the data secure.
- User-specific content management (CRUD operation).

**Facebook** ( MernStack project ) [live link](#) | github> [client link](#) | [server link](#)

**Technologies:** React.js, TailwindCSS, Node.js, Express.js, and MongoDB

- Simple authentication with Firebase.
- This website is fully protected without authentication, nobody can access this site.
- An authenticated user can upload, delete, like, and see who likes a post. Each person can like a post once.
- There is a profile page included with their own post and information.
